

Incredible New Offer for Law Enforcement and Firemen

(Hone your shooting skills in an affordable way)

At G2G we have a lot of law enforcement that come into our range. We always try to remember to thank them for what they do but we started thinking about doing something that shows our appreciation in a more practical way. LE has a very difficult and dangerous job. We also wanted to make it more affordable for officers to practice their most important skill set.... shooting. If their skills erode then they will not be able to protect the public, themselves and their partners like they ultimately would like to. We believe that a conscientious officer should be practicing twice a month at the very minimum.

So starting immediately we are going to be offering a special annual membership (Called the Blue Line Membership) to all law enforcement (includes all federal, state, county, city and ISD officers) and municipal firemen. This benefit is that any of these men or women will be able to shoot without any lane fees an unlimited number of times every year for only **\$149.95**.... even if they come in 365 times over the next year.

As always, this will include one free paper target and complimentary eye and ear protection. And, unlike many ranges, we do not charge by the gun or rifle.

If you know any law enforcement personnel please let them know about our offer. Remember, if officers shoot more their skills should improve and they will better be able to protect the public. Good for everyone!!!
